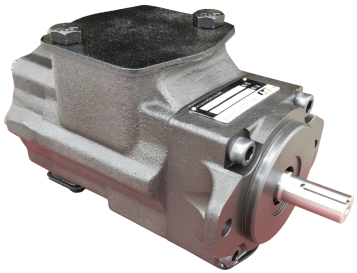
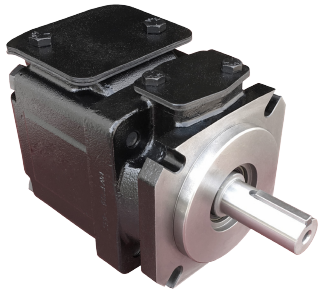
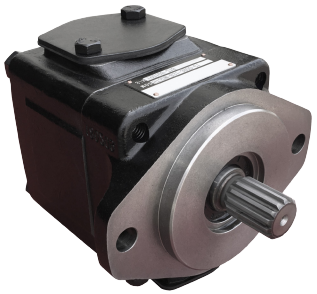
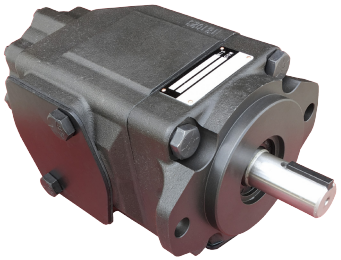
VANE PUMPS









HYFLOW®

WARNING

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

This document and other information from Hyflow Southeast Inc., its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyze all aspects of your application and review the information concerning the product or system in the current product catalog. Due to the variety of operating conditions and applications for these products or systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance, safety and warning requirements of the application are met.

The products described herein, including without limitation, product features, specifications, designs, availability and pricing, are subject to change by Hyflow Southeast Inc. and its subsidiaries at any time without notice.

Please note: All parts supplied are Hyflow Southeast®. The use of other manufactures' names, part numbers, descriptions or trademarks is for cross reference and informational purposes only.

Type of Shaft

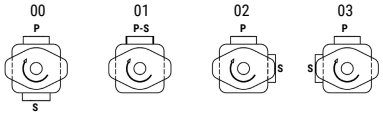
1 = Keyed (SAE B)
2 = Keyed (no SAE)
3 = Splined (SAE B)
4 = Splined (SAE B-B)

Modification

Seal class
1 = S1 - BUNA N
4 = S4 - EPDM
5 = S5 - VITON

Design letter
B = Industrial C = Mobile

Porting combination: (00 = Standard)



Direction of rotation
R = Clockwise
L = Counter - clockwise

To change porting position, follow the steps below:
Secure the pump and remove 4 bolts from housing. Move the housing 1 to 2 mm away from the mounting flange. Insert two bolts halfway into the housing. Install a wrench between the two bolts and turn in the desired direction, so that the required position of the pressure port, with respect to suction is obtained. Reinstall the bolts and tighten to the corresponding mounting torque, as provided.
Instructions: Do not remove the housing completely from the mounting flange, remove only 1 to 2 mm to avoid the cartridge pin from moving out from the housing dowel pin hole. Make sure no piece of paint enters the gap to avoid leakage. If it is difficult to turn housing, put some hydraulic oil into the pressure port to lubricate the pressure port seals.

P - Pressure S - Suction

Direction of rotation (view on shaft end)
R = Clockwise
L = Counter - clockwise

To change porting position, follow the steps below:

1. Secure pump and remove the 4 bolts from the mounting flange.
2. Turn the mounting flange 1 to 2 mm away from the housing. Insert one bolt halfway to mounting flange.
3. Install a wrench between the shaft and the bolt and turn in the desired way, so that the required position of the P1 port, with respect to suction is obtained.
4. Reinstall and tighten the bolts to the specified mounting torque as provided on page 2.
5. Follow the same procedure for changing the P2 port position.

Instruction: Remove the mounting flange/end cap 1 to 2 mm only (do not completely remove the mounting flange/ end cap) to avoid the cartridge pin from moving out of the housing dowel pin hole. Make sure that there are no foreign piece objects that enters into the gap to avoid leakage. If it is difficult to turn mounting flange/end cap put some hydraulic oil in to the pressure port to lubricate the pressure port seals.

HYFLOW SOUTHEAST, INC. VANE PUMP WARRANTY

The Hyflow Southeast vane pump and other parts covered in this catalog are warranted for a period of (1) one year (12 months) from the date of service or 1-1/2 years (18 months) from date of build against any defect in material and workmanship which existed at the time of sale by Hyflow Southeast Inc., according to the following provisions, subject to the requirements that the vane pump must be used only in the appropriate applications and following the Installation and Owner's Manual instructions.

If during the warranty period the vane pump fails due to a defect in any part in material or workmanship that existed at the time of the sale by Hyflow Southeast Inc., the defective part will be repaired or replaced, at the discretion of Hyflow Southeast Inc., at no charge, if the defective part is returned to Hyflow Southeast Inc. with transportation prepaid. Authorization from your sales representative is required to initiate the warranty.

WARNING: The above warranty shall terminate if any alterations or repairs are made to the vane pump other than at Hyflow Southeast Inc.

The foregoing warranty is in lieu of all other obligations and liabilities, including negligence and all warranties of merchantability and suitability, expressed or implied, and state Hyflow Southeast' entire and exclusive liability and buyer's exclusive remedy for any claim of damages in connection with the sale, repair or replacement of the above goods, their design, installation or operation. Hyflow Southeast Inc. will in no event be liable for any direct, indirect, special, incidental or consequential damages whatsoever, and our liability under no circumstances will exceed the contract price for the goods for which liability is claimed.

Hyflow Southeast Inc. is not liable for any repair related cost incurred to the Buyer at any time if the repair is conducted by the buyer without written authorization from Hyflow Southeast Inc.
